## Regulatory Compliance

### FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

#### CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

Note: All brands and trademarks are the property of their respective owners.

Note: The specifications contained herein are subject to change without notice.

#### 警告使用者:

這是甲類的資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。

Enter Configuration

Exit Configuration

### Command Barcode

Scanning the **Enter Setup** Code can enable the engine to enter the setup mode. Then you can scan a number of command codes to configure your scanner. To exit the setup mode, scan the **Exit Setup** code.

Enter Configuration

Exit Configuration

### Important Notes:

All configurations need to go through below steps except Factory Defaults.

Scan “Enter Setup” → “Command Barcode” → “Exit Setup”

### Restore Factory Default Configuration

Restore Factory Default Configuration

### Enable All Symbologies

If Enable All Symbologies feature is enabled, the scanner will be able to read all 1D and 2D barcodes except the command barcodes.

Enable All Symbologies

Enter Configuration

Exit Configuration

### **Enable only 1D Symbologies**

If Enable only 1D Symbologies feature is enabled, the scanner will be able to read only 1D barcodes except the command barcodes.

Enable only 1D Symbologies

### **Enable only 2D Symbologies**

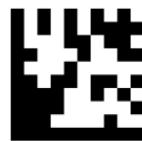

If Enable only 2D Symbologies feature is enabled, the scanner will be able to read only 2D barcodes except the command barcodes.

Enable only 2D Symbologies

### **Disable All Symbologies**

If all symbologies feature is disabled, the scanner will not be able to read any 1D or 2D barcodes.

Disable All Symbologies

### **Disable only 1D Symbologies**

If only 1D Symbologies feature is disabled, the scanner will not be able to read any 1D barcodes.

Disable only 1D Symbologies

Enter Configuration

Exit Configuration

### Disable only 2D Symbologies

If only 2D Symbologies feature is disabled, the scanner will not be able to read any 2D barcodes.

Disable only 2D Symbologies

### Scanning Mode

#### Trigger Mode (Default)

Scanning this bar code will enable the scanner to enter manual trigger mode.

\*\*Trigger Mode

#### Auto Sense Mode

Scanning this bar code will enable the scanner to enter auto sense mode.

Automatic Scanning Mode

#### Continuous Mode

This mode enables the engine to scan/capture, decode and transmit over and over again.

Continuous Scanning Mode

Enter Configuration

Exit Configuration

## USB Interface (Optional)

### USB HID-KBW

By default, the scanner is in HID mode as a Keyboard device. It works on a Plug and Play basis and no driver is required.

\*\*USB HID Keyboard

### USB COM Port Emulation

If you connect the scanner to the Host via a USB connection, the USB COM Port Emulation feature allows the host to receive data in the way as a serial port does. A driver is required for this feature

USB Virtual COM Port

### Terminator Configuration

The scanner provides a shortcut for configuring the terminating character suffix to CR or CRLF and enabling it by scanning the appropriate barcode below.

No terminator

\*\*CR/Enter

Tab

Enter Configuration

Exit Configuration

## Convert Case

**Example:** When the **Convert All to Upper Case** feature is enabled, barcode data "AbC" is transmitted as "ABC".

\*\* No Case Conversion

Convert All to Upper Case

## SYMOLOGIES

### UPC / EAN , 2/5 Add-On Code

An UPC / EAN barcode can be augmented with a two-digit or five-digit add-on code to form a new one. In the examples below, the part surrounded by blue dotted line is an EAN-8 barcode while the part circled by red dotted line is add-on code.

EAN-8 With Add-On 5 Digits

Enter Configuration

Exit Configuration

## Configure decoding length for different types of barcodes

### ● Configure one decoding length.

For example:

Configure scanner to decode Code 128 with the length of 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure one decoding Length"
3. Scan 1 from ASCII Code Table
4. Scan 4 from ASCII Code Table
5. Scan Exit Configuration

### Configure 2 different decoding lengths.

For example:

Configure scanner to decode Code 128 with the length of 2 and 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure Two Decoding Length"
3. Scan 0 from ASCII Code Table
4. Scan 2 from ASCII Code Table
5. Scan 1 from ASCII Code Table
6. Scan 4 from ASCII Code Table
7. Scan Exit Configuration

### ● Configure Decoding Length Range.

For example:

Configure scanner to decode Code 128 within the length from 8 to 14 characters

1. Scan Enter Configuration
2. Scan Code128 " Configure Decoding Length Range"
3. Scan 0 from ASCII Code Table
4. Scan 8 from ASCII Code Table
5. Scan 1 from ASCII Code Table
6. Scan 4 from ASCII Code Table
7. Scan Exit Configuration

Enter Configuration

Exit Configuration

● **Configure Decoding Any Length**

For example:

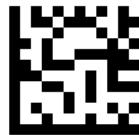

Configure scanner to decode Code 128 with any length

1. Scan Enter Configuration
2. Scan Code128 " Decode Any Length"
3. Scan Exit Configuration

**Code 128 Decoding Length**

Configure one decoding Length

Configure two different decoding Lengths

Configure Decoding Length Range

\*\*Decode Any length

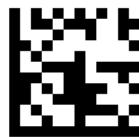

Enter Configuration

Exit Configuration

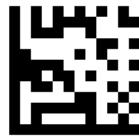

### Code 39 Decoding Length

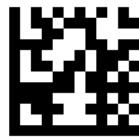

Configure one decoding Length

Configure two different decoding Lengths

Configure decoding length range

\*\* Decode Any Length

Enter Configuration

Exit Configuration

### Code 93 Decoding Length

### Serial command

#### Sending and Receiving format and feedback messages

#### Command format: The following is the command transmission and receiving format

Length (1 Byte)	Source (1 Byte)	ExID (1 Byte)	ExCMD (1 Byte)	Data (MAX 32 Bytes)	High Byte of Checksum (1 Byte)	Low Byte of Checksum (1 Byte)
--------------------	--------------------	------------------	-------------------	------------------------	--------------------------------------	-------------------------------------

**Length :** Data length without Checksum (minimum 5 bits; maximum 36 bits)

**Source :** 0x57 means the terminal sends to the decoder; or

0x52 means the decoder sends to the terminal

**ExID :** Command identifier

**ExCMD :** Command

**Data (MAX 32 Bytes) :** The setting code can be transmitted up to 32 Bytes at a time

**High Byte of Checksum:** Checksum high bit

**Low Byte of Checksum:** Checksum low bit

#### Checksum Calculation

Checksum =  $0x10000 - [ \text{Length} ] - [ \text{Source} ] - [ \text{ExID} ] - [ \text{ExCMD} ] - [ D1 + D2 + D3 + \dots ]$

**Feedback message:** When the terminal sends a command to the device, the device will send back the following message so that the terminal can determine the success or failure of the command

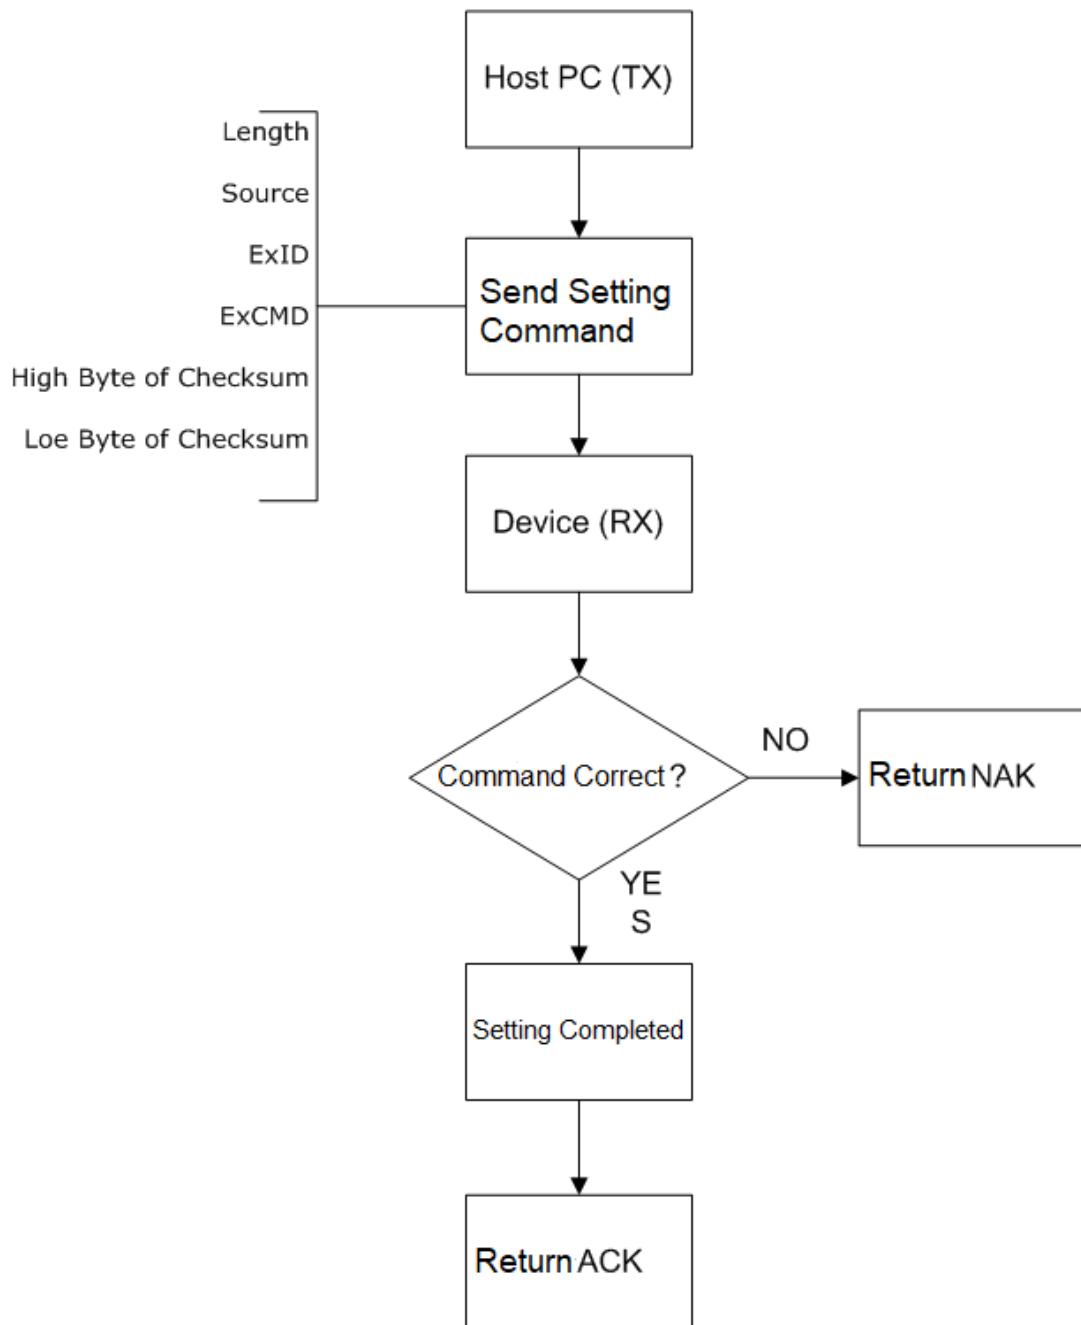

If the setting is successful, the following 5 bytes of hexadecimal data (ACK) are transmitted to the terminal in order.

52	A0	EC	FE	74
----	----	----	----	----

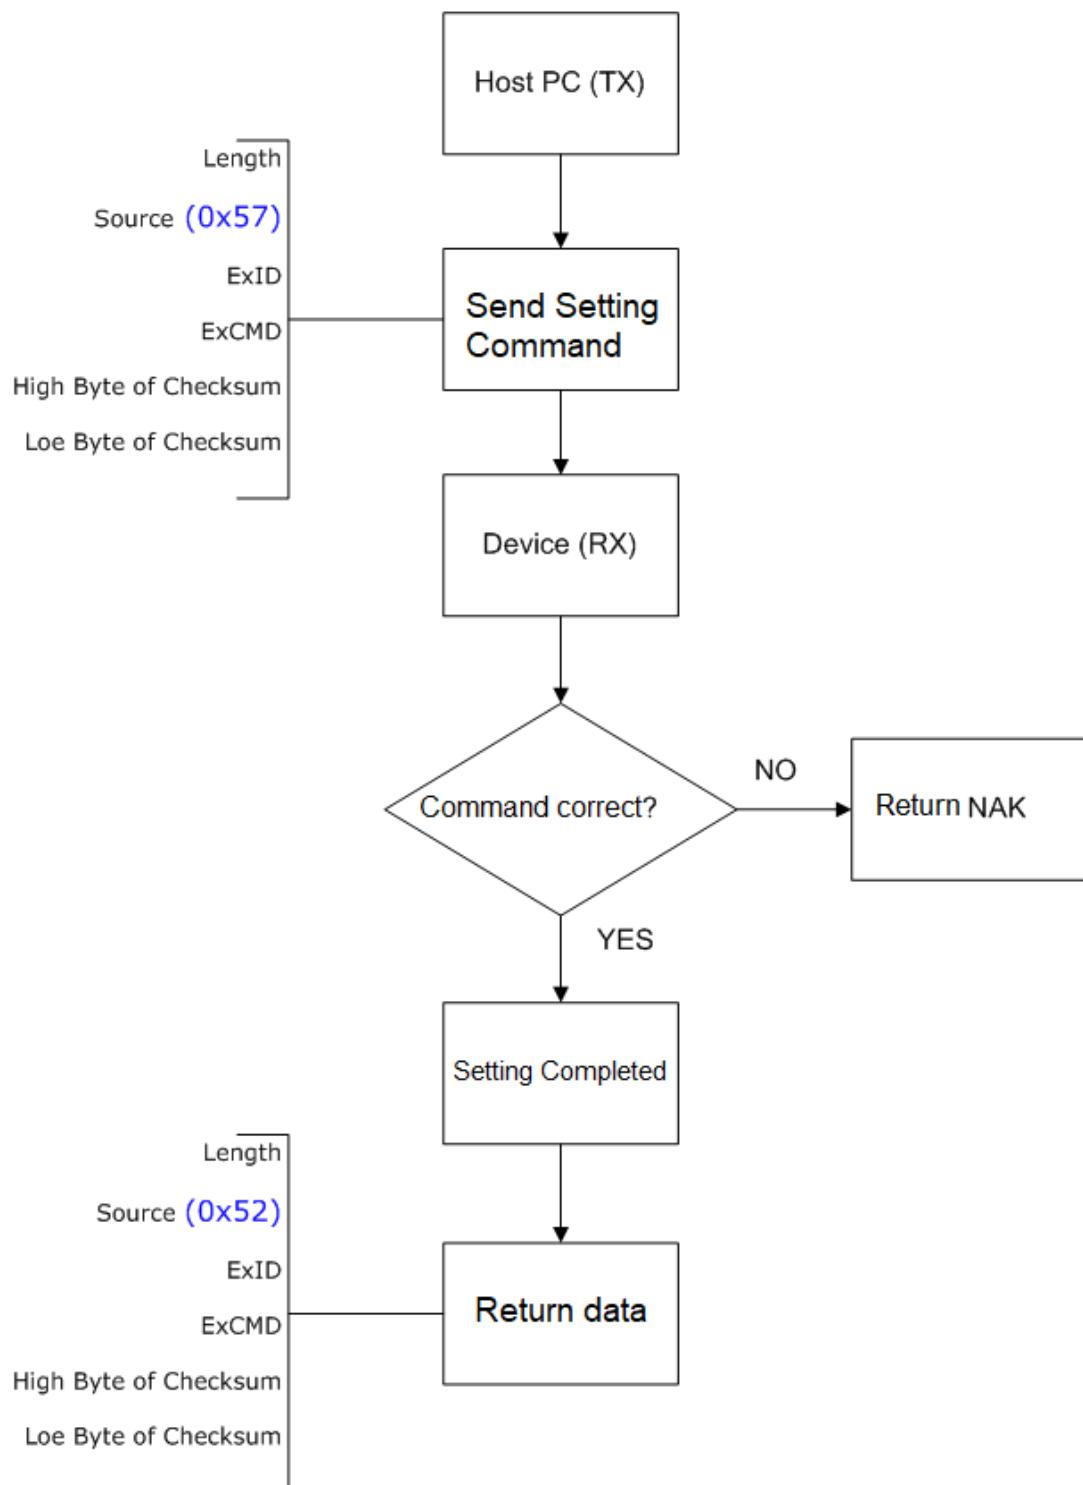

If the setting fails, send the following 5 bytes of hex data (NAK) to the terminal in order.

52	A0	E0	FE	80
----	----	----	----	----

### Setup process

### Reading process

## Command Library

Function	Length	Source	ID	CMD	Data	CS(H)	CS(L)
<b>Check the comm. status</b>	05	57	0E	0D	01	FF	88
