

The Monarch® Sierra Sport2™ 9460™ Portable Printer

Take the printer to the merchandise and keep your employees on the selling floor with customers.

The Monarch® Sierra Sport2™ 9460™ Portable Printer

Taking the printer to the product maximizes employee productivity and customer satisfaction on the sales floor, reduces errors at checkout and saves capital investment in back room printers.

Monarch®
Products & Services

Streamline In-Store Labeling / Maximize Customer Service.

The Monarch Sierra Sport2 printer generates crisp bar codes, alphanumerics and graphics wherever you need printed labels and tags. It makes short work of in-store re-ticketing jobs such as markdowns, returns, exchanges and store transfers.

Mobile Printing. Versatile Power.

The Monarch Sierra Sport2 printer can be carried with complete comfort by hand, waist or shoulder straps. Versatile power options include rechargeable lithium ion battery which can print up 6,000+ inches of supplies on a single charge, AC adapter for stationary applications and RF link option for wireless connection. The lithium ion battery reaches 80% charge in just one hour.

Unique Features for Increased Productivity.

The Monarch Sierra Sport2 printer boasts an easy-to-use 5 button control panel and easy-to-read multi-line display. This durable mobile printer features a protective boot and feet and its unique clam shell design virtually eliminates supply jams. Inside the printer you'll find 2 MB flash memory and a large selection of bit-mapped and TrueType fonts. You'll experience fast, clean imaging up to 3 ips at 203 dpi.

Applications for the Retail Supply Chain

You can use the Monarch Sierra Sport2 printer in just about every area of the retail supply chain. Retail applications include: In-store pricing, re-ticketing, markdowns, store transfers, returns marking, price verification, shelf labeling and service desk printing. Distribution Center and Manufacturing applications include: Bin labeling, receiving, asset management, inventory management, pick-pack-verify, WIP management and cross docking.

It Pays to Accessorize!

To extend the reach of the Monarch Sierra Sport2, we created the Monarch 7400™ RF Link. The 7400 RF Link sends and receives radio signals over a 35 foot range from your data collector to your Sierra Sport2. Simply connect one module to your data collector and with the internal RF Link option in the printer, you have plug and play wireless

connection. The LED shows link status, power status and errors. Since it transmits in 433 MHz band, it doesn't interfere with WLAN communications. The terminal RF Link Module uses standard 9-volt Alkaline batteries which can last more than 120 hours. The printer RF Link Module is ordered as an option installed in the printer. The RF Link helps conserve energy with a built-in power management system. This accessory is sold internationally with alterations to frequency and emission-level requirements of each country.
